

Script Controlled ACL- Restrict Record Access Based on Field

REQUIREMENTS

- Identify restricted field
- Define field values
- Identify authorized users
- Define Read / Write access

BENEFITS

- Improved security
- Prevent unauthorized access
- Better data protection
- Field-based access control

TESTING

- Test authorized user
- Test unauthorized user
- Test different field values
- Test Read / write permissions

SOLUTION

- Create Script Controlled ACL
- Check user role
- Check field value
- Allow / Deny access

PROBLEM

- Unauthorized access to records
- Sensitive data exposed
- Improper permissions
- Risk of data leakage

How might we?

"How might we use a Script Controlled ACL to restrict record access based on a specific field and allow access only to authorized users?"
