

EMPATHY MAP

SCRIPT CONTROLLED ACL-RESTRICT RECORD ACCESS BASED ON FIELD

SAY

What do they say?

- I need access to this record.
- The access rule should work correctly.
- The record should be visible only to authorized users.
- Why can't I view this record?
- Is there a way to get access to this record?

FEEL

What do they feel?

- Confused when they can't access the record.
- Frustrated due to access restrictions.
- Concerned about security and data privacy.
- Confident when their data is secure.
- Relieved when access works as expected.

THINK

What do they think?

- Why can't I access this record?
Is my role correct?
- Which field controls the access?
- Is the ACL script working properly?
- Will this affect my work?
- My data should be secure.

GAIN

What do they need / benefits?

- Secure record access based on field values.
- Proper and correct ACL configuration.
- Reduced security risks and data leaks.
- Easy and controlled access management.
